AMENDMENTS TO THE CLAIMS

In the claims, please amend claim 1 as follows:

- (currently amended) A process for delivering a <u>naked polynucleotide</u> into a cell of a mammal to inhibit protein expression, comprising:
 - making the <u>naked polynucleotide</u> consisting of a sequence that is substantially complementary to a nucleic acid sequence in the mammal;
 - inserting the <u>naked polynucleotide</u>, which is not complexed with another molecule,
 into a vessel in the mammal, wherein the vessel consists of arteries, arterioles,
 capillaries, venules, sinusoids, veins, lymphatics, and bile ducts;
 - c) increasing the permeability of the vessel within the target tissue; and,
 - d) delivering the <u>naked</u> polynucleotide to the cell wherein the protein expression is inhibited.
- 2. (canceled)
- (previously amended) The process of claim 1 wherein increasing the permeability of the vessel consists of increasing pressure against vessel walls.
- (original) The process of claim 3 wherein increasing the pressure consists of increasing a volume of fluid within the vessel.
- 5. (original) The process of claim 4 wherein increasing the volume consists of inserting the polynucleotide in solution into the vessel.
- 6. (original) The process of claim 1 wherein the vessel consists of a tail vein.
- 7. (original) The process of claim 1 wherein the vessel consists of a bile duct.
- (previously amended) The process of claim 1 wherein the cell is a cell selected from the group consisting of liver cells, spleen cells, heart cells, kidney cells, striated muscle cells, and lung cells.
- 9. (original) The process of claim 1 wherein the polynucleotide consists of RNA.
- 10. (canceled)
- 11. (canceled)
- 12. (canceled)

- 13. (original) The process of claim 4 wherein increasing the pressure consists of increasing a volume within the vessel.
- 14. (original) The process of claim 13 wherein the pressure is sufficient to increase organ volume.
- 15. (original) The process of claim 13 wherein the pressure is sufficient to increase extravascular volume.
- 16. (original) The process of claim 1 wherein the vessel consists of a liver vessel.
